

CLOSTRIDIA TESTING

Clostridia testing for cheese production

Eastern Laboratory Services (ELS) can help dairy manufacturers manage their food safety risk by providing the most accurate, timely and cost-effective Clostridia testing services for cheese production.

- Enrichment testing for *Clostridia tyrobutyricum* and *Clostridia butyricum*
- 10-tube MPN
- Can test for spores or vegetative cells
- More effective at detecting Clostridia that causes cheese defects than other methods
